

SHE CAN STEM

Many girls reported feeling inspired and more confident about choosing science and mathematics subjects

HANDS-ON SCIENCE EXPERIMENTS

One of the most exciting parts of the celebration was the hands-on science experiment stations led by our female science teachers and invited guests from local STEM careers. Learners rotated between stations where they explored science through active participation and discovery.

GIRLS IN ROBOTICS AND CODING

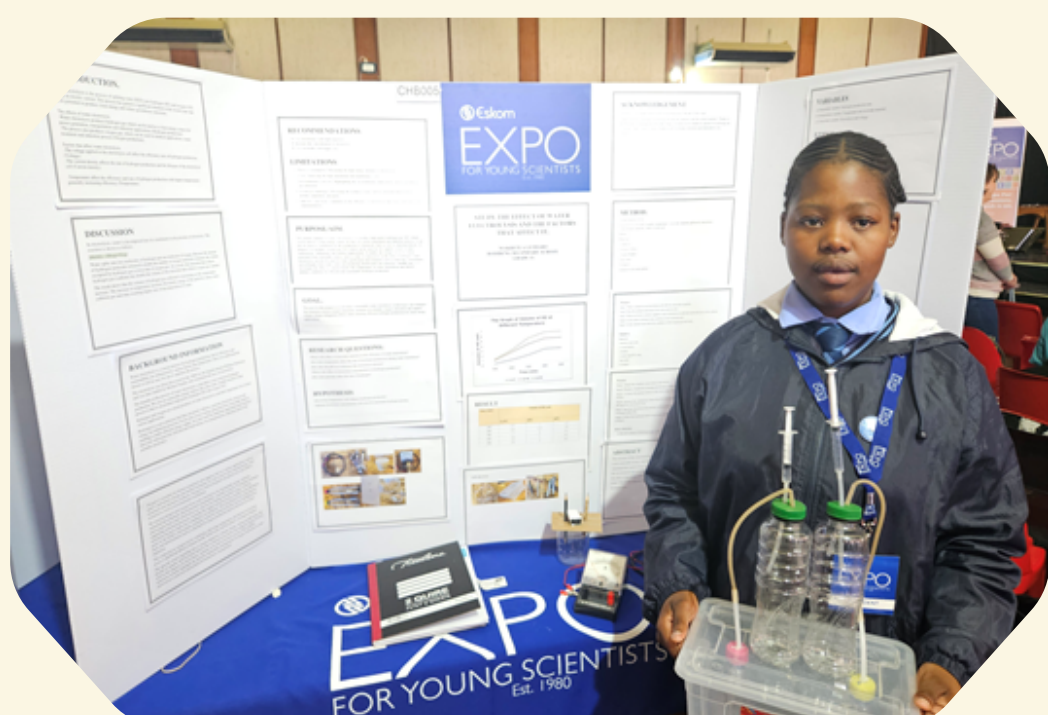

One of the highlights of the celebration was watching the girls dive into robotics and coding projects with such enthusiasm. They teamed up to program simple robots, tackle coding challenges, and put their designs to the test, all while working towards completing specific tasks.
